

F4-15 110cc

POCKET BIKES

One nice way to blast from 0 to 85km/h for well under \$1,000!

If fast acceleration and flat out speed are your primary objectives, the F4-15 could be exactly what you're looking for. This bike packs our performance 110cc, 4-stroke engine, Chain Drive, and Automatic Transmission. With a 280 lb capacity, it has no problem sustaining its optimal performance with both kids and adults.

Front Hydraulic Fork, and Rear Adjustable Monocross suspension allows for custom tuning of the F4-15 handling capabilities, while a powerful front and rear Disk Braking system ensure rock solid stopping.

Hot look, sweet sound...

Front /Rear steel bumpers, and a set of premium racing tires on custom aluminum rims set the F4-15 aside from other bikes, while a performance exhaust sets the tone for nothing short of RAW power! Go ahead... Wind that snappy 110cc up to 7,000 rpm for a sound that's just down right nasty!

High performance with safety in mind...

The F4-15 is ready for day and nighttime driving with full headlights, taillights, break lights, and even turn signals! The F4-15 is also fully equipped with Electric and Remote Start, while a fully functioning security alarm warns you of anyone tampering with the bike.

Conclusion

Think about it... Where could you find more fun for \$799.99? A pool, \$20,000... A return airline ticket to BC, about \$2,000... A full size motorcycle, about \$12,000... Face it... It's tough to find this kind of fun, and fun that will last many years for this kind of money! Affordable fun is what Daymak is all about and the F4-15 pocket bike is just one more way we prove it!

4 STROKE ENGINE

SPEEDO

The Daymak commitment to quality and satisfaction

While many small players and superstores are now attempting to get onboard the Pocket Bike marketplace, what they conveniently fail to make clear are their terms of warranty and aftermarket service policies. In the case of larger stores, the mentality is generally "your problems are not our problems, so here's a nice 1-800 number to call". In other words, we sell Pocket Bikes --we do not fix them, nor do we stock parts for them. Now go sit on a 1-800 hot line for several hours!

Buy Daymak --Avoid an aftermarket anxiety attack!

Rest assured... In the unlikely event of a problem, Daymak will not cast the grim reaper of (1-800-third-party chaos) on you! We "personally" service everything we sell. The Daymak onsite service shop employs several highly skilled mechanics; all of which are highly proficient in small engines repairs and modifications. Even more impressive is our onsite inventory encompassing a whopping 3,000 parts. Yes, that means we stock "every" part for all Pocket Bikes we sell, from handle grips, drive train components, to the entire engine! Best of all, we can ship parts to your doorstep within 24-hours.
